

## Scope e-Knowledge Center to Exhibit at Frankfurt Book Fair 2016

Chennai, India, September 29, 2016: Scope e-Knowledge Center (Scope), a leading provider of knowledge services and a Quattro Global Services company, is pleased to announce its participation at the forthcoming Frankfurt Book Fair from October 19 - 23, 2016. Scope will welcome attendees to Booth # L88, Hall 4.2. Scope will also make a presentation at the "Hot Spot" session on 'Improving Discovery of Book Content' in Hall 4.2 on October 20<sup>th</sup> at 5 pm.

This year, Scope will feature its state of the art proprietary platforms/solutions for enhancing data and content. These include:

- **diSCOver™**: *diSCOver* employs Scope's proven "assisted automation" approach that blends proprietary automation technology with intervention from SMEs to create solutions for its clients. It deploys domain-specific knowledge frameworks to support the development of controlled vocabularies: Taxonomies, Thesauri and Ontologies, and indexing of documents using the knowledge framework.
- **ConSClse™**: *ConSClse* offers publishers and other information providers a unique opportunity to enhance discoverability of their content by providing keywords and keyword-rich abstracts/summaries, for more robust metadata. The *ConSClse* platform blends proprietary software with subject matter expert (SME) curation to deliver high-quality abstracts and keywords.
- **InDEXr™**: *InDEXr* offers publishers and online information providers a unique opportunity to enhance the discoverability of their content by accurate and precise indexing. This is achieved by combining technology and human judgment on the same platform. *InDEXr* uses a combination of proprietary software, in the form of statistical, linguistics and Natural Language Processing (NLP) rule, and subject matter experts (SMEs).
- **AuthEntik™**: *AuthEntik* uses a combination of automated algorithms, manual validation and standardized data repositories to develop fast, scalable and high-quality databases of disambiguated author names their affiliations, publications and other related data. Using this database, *AuthEntiK* can also provide clustering and visualization of relationships across authors.
- **TranSClse™**: *TranSClse* is a technology-enabled hybrid abstraction and indexing solution for enhancing the discoverability of non-English literature in search engines and A&I services. The *TranSClse* solution uses a judicious combination of technology-enabled automation processes for translation and subsequent abstraction and further SME curation to achieve high-quality abstracts that represent the core themes of the non-English document.

Scope invites prospective partners to its booth to discover more about Scope and the services offered by the company. Scope representatives will be on hand to discuss the wide range of services offered by Scope across the information value chain.

If you would like to book an appointment with our team members at the Fair, please contact Deborah at [Deborah@scopeknowledge.com](mailto:Deborah@scopeknowledge.com)

## About Scope e-Knowledge Center

Scope, a Quattro Global Services company, is an award-winning provider of outsourced, cost-effective Content Enhancement Services, Data Management Services, Business Research Services and Patent Analytics for various clients across the globe. Scope, a niche knowledge services provider, has employees from various educational backgrounds and experience delivering knowledge solutions across multiple industry verticals and domains. Scope fulfils customer needs by leveraging its experience and capabilities using in-house developed proprietary technology solutions and platforms for service delivery as well as its internal needs. Scope is also the publisher of the daily newsletter Knowledgespeak, a comprehensive news service focusing on the STM information industry.
