

## **Scope e-Knowledge Center releases its second “GoGreen” series report titled “Switchgrass - A Second generation Biofuel Alternative Feedstock – A Market & IP Perspective”**

Chennai, India, October 26, 2009: Scope e-Knowledge Center (Scope), a leading content and knowledge services company, has launched the second report from its “GoGreen” series of thought leadership initiatives with a report on the “**Switchgrass - A Second generation Biofuel Alternative Feedstock – A Market & IP Perspective**”. Sivasdas, CEO of Scope e-Knowledge Center, says *“Continuing with our thought leadership program and in response to the phenomenal success of our first offering on the Solar Photovoltaic cell industry, we are pleased to present this second report in the emerging Switchgrass industry”*.

This research report by Scope e-Knowledge Center throws light on the current status of the Global Biofuel industry, sources for Biofuel production, alternative technologies for cleanenergy through biofuels, demand and future scenarios.

### ***What does this report offer?***

Currently the global Biofuel technology area is attracting considerable investments and huge sponsorships from the Government and Private Energy participants. The on-going research in the area of ethanol as a Biofuel alternative to conventional fuel has been following a “trial and error” methodology for which Switchgrass based biofuels present an efficient technological solution.

The report includes a detailed proprietary analysis on the various technology clusters in the Biofuel technology space. Also presented is an in-depth perspective of the leading assignees in this space, inventors and the technology shifts that are happening in the industry. A geographic analysis of the assignees as well as the individual market trends and government initiatives driving the industry in each geographical region is also covered.

Adds Sivasdas, *“Unlike other reports available in the market that assess this industry only from a market perspective, a unique insight offered by this report is a detailed IP perspective as well. We have also evaluated the innovation occurring in this industry using a proprietary technology cluster evaluation subsequent to a detailed analysis of the patent families. I’m sure this will be especially appreciated by intellectual property specialists, R&D leaders and technologists”*.

This report is priced at US\$ 1,500 per electronic copy (PDF format). Place your order today at: <http://scopeknowledge.com/GoGreenForm.aspx>

Also available at this location is a complimentary copy of the Abstract and List of Tables & Exhibits. For further details on this report/ ordering your copy, get in touch with:

## About Scope e-Knowledge Center

Scope e-Knowledge Center, a Quattro group company, is a leading content and knowledge services company helping clients build intellectual property. Scope offers world-class database, research and analysis services to clients in the US, the UK and continental Europe. In operation for over 22 years, Scope has built a strong international clientele. Headquartered in Chennai, India, our sales and support network spans Illinois and Virginia in USA, London, Brussels, Amsterdam, Tokyo & Melbourne.

Scope has a large pool of highly experienced and trained professionals across major Engineering domains (including Mechanical, Electrical & Electronics, Communication & Computers, Semiconductors, Instrumentation, Transportation and Industrial Engineering), Biotechnology, Pharmacology, Life Sciences, Chemical sciences, Medical Professionals & Management Professionals who partner with well qualified English language editors to deliver the final product. In addition Scope has a team of well qualified 300 patent specialists and business research analysts. Scope provides content and knowledge services, including document abstracting and indexing, in other domains including all branches of chemistry, pharmaceuticals, business, and healthcare.

Scope is uniquely positioned to offer accurate and high value added services through an optimal mix of technology, subject matter/domain expertise, and use of proprietary processes.

## About Quattro

Quattro is a BPO company founded by Raman Roy, who leads a team of highly experienced professionals. Quattro focuses on pioneering new service lines, geographies and business models in Business Process Outsourcing. The company provides a range of vertical and horizontal service offerings which are targeted towards global clients in North America, Europe and Asia.

“Creating value through innovation” is the cornerstone of Quattro's business philosophy. The company endeavors to provide its clients with innovative solutions at lower costs through a combination of tools, platforms and business processes.
